

Subject: Docket # 98N-1038

To : Food and Drug Administration

From : Leon L Lafaille - Eileen Lafaille

FRAUDATION in the production, processing and handling of food is an important issue with our family. It is important that the logo or statement is clearly understood by the consumer!

When I select an item, I want to be positive that the logo is clearly marked and necessarily understood as to the nature of the item I select.

I can't emphasize the importance of the public understanding the identification process. It must be clearly understood so that I can make an intelligent decision -

Thank you

Leon L Lafaille
